**VOGO
SCOPE**

French Gymnastics Federation (FFGym) signs its commitment to VOGOSCOPE through a 3-year partnership contract.

Fédération Française de Gymnastique (FFGym), ABEO (ISIN FR0013185857, ABEO) and VOGO (ISIN FR0011532225, ALVGO) announce the signature, during the *Internationaux de France* this weekend at Accor Arena in Paris, of a three-year partnership to roll out innovative video solutions for the practice of gymnastics in France.

By choosing VOGOSCOPE, the leading turn-key solution for multi-camera capture and live and replay broadcasting, targeting amateur sports and disciplines rarely broadcasted on TV, as well as training centres and local authorities, FFGym is reasserting its commitment to all gymnastics stakeholders to implement its digital strategy.

As part of the new partnership, VOGOSCOPE will support FFGym in its digital transformation and is setting up video capture, broadcasting and analysis kits at national, regional and club levels.

In terms of broadcasting, VOGOSCOPE brings FFGym additional resources for promoting major national competitions, including the France Elite championships and the Top 12 clubs competition. These events will be broadcasted live on the VOGOSCOPE app and the [MaGymTV](#) platform.

The partnership also includes the provision of video solutions to improve the performance of athletes. In addition, FFGym intends to use VOGOSCOPE to train coaches and judges, and generate editorial content.

Commenting, James Blateau, Chairman of FFGym, said: *“FFGym has been committed for five years to a strategy to digitalise and innovate in gymnastics. After the implementation of the MaGymTV streaming platform, it was a natural move for us to adopt enhanced capture and streaming solutions to boost the visibility and media coverage of our sport. And the partnership serves two functions, as the chosen solutions can also be used to improve the performance of our gymnasts, which is a key priority given the Paris Olympics next year.”*

Laure Vianot, C.O.O of VOGOSCOPE, said: *“The signing of this partnership is the result of field work conducted with clubs, divisions and committees to understand the specific needs of all types of gymnastics. It is thanks to the involvement of high-level club coaches, interested in how video can boost their coaching sessions, that we were able to develop specific features for gymnastics in our analysis tool.”*
